## Overview

Physical therapy is a branch of rehabilitative medicine aimed at helping patients maintain, recover or improve their physical abilities. Physical therapy or physiotherapy (sometimes abbreviated to PT) is a healthcare profession primarily concerned with the remediation of impairments and disabilities and the promotion of mobility, functional ability, quality of life and movement potential through examination, evaluation, diagnosis and physical intervention. The team of physiotherapist aims to give the best quality patient care within the happy environment. A Physiotherapist (also known as a Physical Therapist) is a very important member of the healthcare team where his responsibility is to rehabilitate patients back to normal without medicines by the use of exercise, manual therapy, rehabilitation techniques and physical activity. Bachelor of Physiotherapy is an undergraduate course which trains the students in a skill of diagnosing and treating various musculoskeletal, neurological, cardiovascular and respiratory conditions. The student after undergoing an extensive training in this course after four and a half years the Physiotherapist is able to treat the patients using the various physical and mechanical means. Rehabilitation is the major part of Physiotherapy and it enables patients to regain their healthy life and enables them to return to their family/professional life as soon and as possible. The role of physiotherapist is not only limited to treating the disease but a skilled physiotherapist can also understand the problems with current lifestyle of the patient which leads to major problems in long run and may design the appropriate treatment programme including but not limited to exercises, ergonomics, life style modifications, use of accessory tools and techniques to prevent the potentially morbid condition thus reducing the overall mortality in endangered group of patients like Smokers, obese people, Diabetics, Hypertensive, Geriatric, etc. After completion of this course the Physiotherapist can either work in a hospital or a clinic or can even set up their own practice individually. A physical therapist's job involves helping patients to recover and/or rehabilitate from a state of having been incapacitated from neurological, musculoskeletal, cardiopulmonary, sports, geriatrics, oncology impairments among others. He/she has the responsibility to help restore the patient's body to its optimal functioning level. India's job market face the dearth of physiotherapist and it can be attributed to the fact that there is not much awareness about the scope and prospects of the profession. Physiotherapist are of creative minds, excellent, innovative, exemplary healthcare professionals who have the passion for their work, inspiration for their patients, excellent performance for the patients care from every age, stage and walk of life.

Physical therapists have ample job prospects in Hospitals, Nursing homes, Residential homes, Rehabilitation centers, Private offices such as Private practices or Private clinics, etc. Additionally, a person with qualification in physiotherapy can work at Out-patient clinics, Community health care centers or Primary health care centers, Fitness centers or Health clubs, Occupational health centers, Special schools and Senior citizen centers, etc.

Santosh College of physiotherapy is one of the top-ranking College providing excellent education as well as training in the field of physiotherapy. It was established in 1996 with the aim to provide best quality care treatment and excellent education in the field of physiotherapy. Teaching at the institution is problem-based and our highly qualified and clinically oriented staff uses a variety of contemporary pedagogic strategies that include a judicious knowledge of laboratory instructional facility. Apart from adopting innovative teaching methods, it has also developed an innovative curriculum. It uses a blend of classroom, practical and community engagement to promote holistic learning.

## BPT ELIGIBILITY CRITERIA

Course	BPT
Full form	Bachelor of Physiotherapy
Eligibility	10+2 with aggregate 50%marks in physics, chemistry and Biology from a recognized board
Duration	Four and a half years(4.5 years)
Course Type	Regular mode

## COURSE OUTLINE

To get a better idea about the course structure and syllabus, let us take a look at some of the important subjects present in the program. PHYSIOTHERAPY program is divided into 4 academic years (8 SEMEMSTERS) . We will check out important subjects present in each academic year(8 semesters).

### 1st Semester

- Human Anatomy I (Including Applied Anatomy)
- Human Physiology I (Including Applied Physiology)
- Biochemistry
- Biophysics
- Health Psychology

### 2nd Semester

- Human Anatomy II (Including Applied Anatomy)
- Human Physiology II (Including Applied Physiology)
- Biomechanics And Kinesiology I
- Yoga-Basic Theory Science And Techniques

### 3rd Semester

- Exercise Therapy I
- Electrotherapy I
- Biomechanics And Kinesiology II
- Microbiology

### 4th Semester

- Exercise Therapy II
- Electrotherapy II
- Pharmacology
- First Aid And Emergency Care
- Pathology

## 5th Semester

- Cardio Pulmonary Medicine And Surgery
- General Surgery
- General Orthopaedics And Traumatology
- General Medicine

## 6th Semester

- PT In General Medical And Surgical Condition
- Regional Orthopaedic And Diagnostic Imaging
- Clinical Neurology And Neurosurgery
- Community Physiotherapy And Rehabilitation

## 7th Semester

- Physiotherapy Orthopaedics I
- Physiotherapy In Neurology I
- Physiotherapy Cardiopulmonary Condition I
- Physiotherapy In Sports I
- Research Methodology And Biostatistics

## 8th Semester

- Physiotherapy In Orthopaedics II
- Physiotherapy In Neurology II
- Physiotherapy In Cardiopulmonary Condition II
- Physiotherapy In Sports II
- Research Project

## TEACHING & RESEARCHES

The teaching classes includes a balance of clinical training and meetings, journal clubs, clinical case studies and project work, as well as active community-based rehabilitation through awareness program and camps. Students also get exposure through guest lectures, panel discussions, symposia, seminars and workshops for hands on training throughout the year.

## WORKSHOPS AND CONFERENCES

Besides coursework, clinical trials and serving the people, the Physiotherapy College takes pride in the co-curricular and extra-curricular achievements of the students. With leisure and group activities, we also organized recreational tours for our students.

## RECREATIONAL TOUR

## Our Vision

Provide widely recognized leadership in the improvement of teaching , learning and the assessment of educational outcomes through modern technology and research. The team at physiotherapy college aims to give the best quality physio care within the happy environment. We at Santosh are the team of creative, excellent, innovative, exemplary healthcare professionals who have the passion for their work, inspiration for their patients and students, excellent performance as physios here care for their patients from every age, stage and walk of life. Our vision is to try to fulfill the following values

- **Empathy** - The Foundation Of Compassionate Healthcare Professionals
- **Quality** - The Foundation Of Evidence-based, Whole-patient Treatment
- **Integrity** - The Foundation Of Trust And Authenticity
- **Performance** - The Foundation Of Healthy Patients
- **Innovation** - The Foundation Of Outstanding Personal And Diseases Related Results. Also For Research
- **Commitment** - The Foundation Of Engagement And Leadership

Our aim is to to be regarded as the most reliable and effective physical therapy practice in the society, driven by excellent results and a knowledgeable, creative, friendly and efficient staff.

## Career Path

**Government Jobs:** BPT course graduates get jobs in both government sectors. Now a day's every government hospital is having multiple vacancy for physiotherapist whether it is run by state government or central government and also they provide good pay scale.

**Hospitals:** Hospitals mainly hire physiotherapists to help treat the patients with physical dysfunction and impairment for different departments. They are qualified to perform physical examination and conduct assessments to detect a diagnosis process. In order to treat dysfunction and monitoring of treatment they select appropriate physical therapy interventions. A successful Physiotherapist uses various therapeutic intervention techniques to treat a patient in the best possible manner.

**Healthcare Centres:** Healthcare centres recruit physiotherapist who work on the patients' wellness and fitness and focus on areas of improvement. They also guide patients with their dietary plans and supplements that will help in boosting their metabolism.

**Corporate Houses:** Physiotherapists hired by the corporate houses work for the health and fitness of their employees. The physiotherapists organise workshops and exercise sessions for the employees and promote them to stay fit and fine, both mentally and physically.

**Private Clinics:** Physiotherapist can open an independent private clinic with advanced modalities.

**Rehabilitation Centres:** As the name suggests, these centres work mainly on improving the lives of patients admitted there. A physiotherapist here will help and support the experts working on the patients. Different exercises, for both mind and body, are taught by the physiotherapists in a rehabilitation centre.

**Sports and Fitness Centres:** A physiotherapist at a sports and fitness centre works with the experts for the fitness of the clients. Maintaining the records of the clients and to figure out which fitness programme should be scheduled for a particular day, is also a task of the physiotherapists of the sports and fitness centres.

**Defence Establishments:** At a defence academy or establishment, the role of the physiotherapist rotates from planning the exercise sessions to treating the injuries of the defence personnel.

Physiotherapists have good scope internationally as well as in India as the market for it is more expanded in countries where it is accepted as an effective method to cure various ailments and health problems. Even compensation packages for physiotherapists are attractive in the USA, UK, Australia and Canada as well as in India and that may be a reason why many successful Physiotherapists start their profession or start working with health solution providers in these countries and earn attractive salaries.

## ADVANTAGES OF PHYSIOTHERAPY

Physiotherapy helps in many aspects in today's day to day life
