Dr. P Mahalingam

*Founder Chairman
MD (General Medicine),
DM (Cardiology), FCCP*

Healthcare has never been the work of doctors alone. It is the collective strength of multiple professionals—diagnosticians, technologists, therapists, rehabilitation experts, and caregivers—working in seamless coordination that truly defines patient outcomes. Yet for decades, Allied Health Sciences remained one of the most under-recognised pillars of the healthcare system.

At Santosh Deemed to be University, we chose a different path.

At a time when Allied Health Sciences attracted limited attention, minimal policy focus, and little institutional investment, we consciously began building structured academic programs, clinical training pathways, and professional dignity for these disciplines. This decision was rooted in a simple belief: no healthcare system can function, sustain, or advance without a strong allied health workforce.

Allied health professionals have often been viewed as supporting roles. In reality, they are the building blocks of modern healthcare—enabling diagnosis, ensuring continuity of care, supporting recovery, and translating medical decisions into real patient outcomes. What no doctor can achieve alone is made possible through the skill, precision, and commitment of allied health teams.

Santosh's integrated university-hospital ecosystem was designed to reflect this philosophy in practice. With a 900+ bed teaching hospital at the heart of our campus, Allied Health Sciences education at Santosh has always been clinical, hands-on, and responsibility-driven. Our students learn not in isolation but as part of real multidisciplinary healthcare teams—understanding their roles, accountability, and impact on patients' lives from the very beginning.

Today, national policy has begun to recognise what we believed in years ago formally. The emergence of structured regulation and professional identity through the National Commission for Allied and Healthcare Professions (NCAHP) reflects a long-overdue acknowledgement of this sector's importance. While frameworks are now taking shape at the national level, Santosh had already laid strong academic and clinical foundations for Allied Health Sciences well in advance.

As the University completes three decades of service in healthcare education and patient care, our commitment remains unchanged. We will continue to strengthen Allied Health Sciences as a core academic and professional domain—guided by quality, ethics, clinical relevance, and social responsibility.

I take pride in our students, faculty, clinicians, and healthcare teams who embody this vision every day. They represent the future of healthcare—not as underdogs, but as essential professionals shaping safer, stronger, and more humane health systems.

Vice Chancellor Message

Prof. (Dr) V. N. Mahalakshmi,

Vice Chancellor - Santosh Deemed to be University

Choosing Allied Health Sciences means choosing a career at the core of healthcare delivery. At Santosh Deemed to be University, we are proud to shape professionals who are competent, confident, and compassionate. Our programmes are grounded in the University's vision of excellence, guided by a strong mission to develop capable healthcare professionals, and upheld by core values of integrity, innovation, teamwork, and social responsibility.

As you enter the academic session 2026-27, you join a rapidly evolving sector under the National Commission for Allied and Healthcare Professions (NCAHP). We recognize that regulatory changes can be challenging, and our dedicated faculty, academic systems, and mentoring support ensure clarity, compliance, and confidence at every stage.

With hands-on clinical exposure, skill-focused training, and career guidance, our graduates are prepared for rewarding opportunities in India and abroad. We warmly welcome you to Santosh University—where meaningful healthcare careers begin.

Dean's Message

Prof. (Dr) Akshay Bhargava

Dean, Faculty of Dental Science - SDC

It gives me great pleasure to introduce the Diploma Hygienist Course (DHC) program at Santosh Dental College & Hospital. This program is designed to equip students with comprehensive knowledge and hands-on skills in patient care, clinical procedures, and healthcare management. With a strong focus on practical training and professional development, students will gain real-world experience in hospital and dental healthcare settings. We are committed to fostering excellence in healthcare education and preparing skilled professionals for the growing medical and dental industry. I welcome aspiring students to embark on this rewarding journey in healthcare.

HOD's Message

Prof. (Dr) Kanishk Gupta

HOD - Department of Periodontology & Oral Implantology

At Santosh Dental College & Hospital, we are committed for providing quality education and practical training in healthcare. The Diploma Hygienist Course (DHC) program is designed to equip students with essential clinical skills, patient care expertise and healthcare management knowledge. This course offers hands-on training in dental and medical care, preparing students for diverse career opportunities in the healthcare sector. With expert faculty, state-of-the-art facilities, and a comprehensive curriculum, we aim to shape skilled professionals who contribute effectively to patient care. I welcome aspiring students to embark on this rewarding journey with us.

Program Overview

The program equips students with strong preventive dentistry skills through hands-on clinical training in scaling, polishing, radiology, infection control, and community outreach, preparing them for competent, patient-centered oral healthcare roles.

The Dental Hygienist Course at Santosh Dental College & Hospital is designed to provide students with strong foundational knowledge and advanced practical skills in preventive dentistry and oral health management. The curriculum includes dental anatomy, oral hygiene techniques, periodontal care, dental radiology, and patient education. Students receive extensive hands-on clinical training, learning to perform scaling, polishing, fluoride application, oral prophylaxis, and assisting in periodontal procedures under faculty supervision. The program emphasizes infection control, sterilization protocols, instrument handling, and maintaining a safe and efficient dental environment.

Along with clinical learning, students actively participate in school dental camps, oral screening drives, and community outreach programs that promote public awareness on oral hygiene and disease prevention. These experiences help students develop communication skills, professional confidence, and a deeper understanding of public health dentistry.

Dental Hygienists are well-prepared for careers in dental clinics, hospitals, public health organizations, community health centers, and research institutions, contributing effectively to improved oral healthcare services and enhancing overall patient well-being.

Course **Insights**

Hygienists work as oral hygiene experts in clinics

Learn Dental Anatomy & Dental Instrumentation

Outreach initiatives promoting oral health

Counseling patients on hygiene and prevention

Gain real-world experience through dental procedures, patient management, and preventive healthcare.

Course **Curriculum** (2 Years)

Year	Focus Areas (As per NCAHP Guidelines)
1 st	Builds strong foundations through anatomy, oral sciences, radiology, periodontology, practical lab training, infection control, scaling practice, and essential clinical exposure for preventive dental care.
2 nd	Focuses on advanced periodontology, radiology, clinical hygiene skills, patient counselling, emergencies, supervised scaling, fluoride therapy, and extensive community outreach through camps, screenings, and clinical postings.

Hands-on dental hygienist training emphasizing scaling, infection control, patient comfort, precision instrumentation, and supervised clinical skill development practices.

Career Prospects

Dental Hygienist in Clinics & Hospitals

Work in dental hospitals, private clinics, and multi-specialty hospitals, performing scaling, polishing, and periodontal care.

Oral Health Educator

Conduct awareness programs in schools, corporate offices, and community health centers.

Public Health Specialist

Work in government health programs, NGOs, and community dental care initiatives.

Dental Product Consultant

Join dental product companies to promote and educate professionals on oral care products.

Further Studies & Specialization

Advanced training in periodontics, oral health sciences, and public health dentistry strengthens clinical skills, preventive care expertise, and community-focused practice.

Clinical Facilities

Dental hygienist students gain diagnostic exposure through supervised panoramic imaging, patient positioning, radiation safety protocols, equipment handling, and clinical interpretation under expert faculty guidance training.

Dental hygienist students perform supervised oral examinations, scaling, infection control practices, ergonomic positioning, instrument handling, and patient communication within modern clinical training environments facilities.

Student's Testimonials

"Completing my Dental Hygienist course at Santosh Deemed to be University has been an incredible journey. The dedicated faculty provided unwavering support, guiding me every step of the way. The state-of-the-art infrastructure and hands-on training enriched my learning experience, preparing me for a rewarding career in oral healthcare."

Ankit Singh, Batch 2022-2023

"It has been a transformative learning experience at Santosh Deemed to be University while pursuing Dental Hygienist Course which has paved my career path to cater the dental needs of the people. The faculties are very supportive to carve my skills to become a good dental hygienist."

Manjeet, Batch 2022-2023

Hands-on dental hygiene training builds precision, infection control awareness, and clinical confidence through supervised clinical & laboratory practice.

Gentle pediatric dental care focuses on comfort, hygiene, and early prevention, ensuring positive experiences while building strong foundations for lifelong oral health.

Dental hygiene students provide instructions on oral hygiene, brushing techniques, and patient education, gain practical skills, communication confidence, and preventive care expertise under supervision.
