He has various national and international publications and books to his credit. He has recently received the "Best Implantologist award of the year" award in 2022.

FROM HOD'S DESK

OVERVIEW

Dental Mechanic Course (DMC) is a diploma course related to Dentistry. Basically, it is the course to train the candidate (student) in the field of Dental education. Dentistry and particularly Prosthodontics (major branch of Dentistry) is largely dependent upon laboratory assistance. It is mandatory that for the success of any prosthetic Dental treatment, the work received from the Dental laboratory is precise.

Dental Mechanics are professionals who work behind the scenes supporting the dental doctors to give the patients perfect Dental prosthesis such as dentures, crowns, bridges, eye prosthesis, ear prosthesis, nose prosthesis and other dental appliances. These skilled professionals ensure that patients receive high-quality Dental restorations that fit comfortably and function properly.

During the two-year course, the students acquire laboratory skills through hands-on experience. They acquire knowledge and skills needed to fabricate dental restorations including metal, ceramic crowns and bridges, complete dentures ceramic crowns and bridges as well as computer aided milling for fabrications of Dental prostheses and the use of intraoral scanners for fabrication of prosthesis.

ELIGIBILITY CRITERIA:

- The candidate must have passed 10+2 or two years intermediate or equivalent, thereof with science subjects i.e., Physics, Chemistry and Biology from a recognized Indian University or Pre-University/ Intermediate Board.

ADMISSION PROCESS:

The students can opt for Direct Admission process. The desired students can directly contact us for securing seats in the program. For more details, kindly visit admission.santosh.ac.in

CAREER PATH:

- The Dental Schools and Hospitals (Government as well as Private) have the requirement to appoint the Dental Mechanics as per the Dental Council of India regulations.
- These professionals can get attached to Dental laboratories.
- A Dental Mechanic can even start his own Dental laboratory to cater to the needs of Dental clinics in that area.
- They can be employed by the Dentists in their clinic.

WHAT WE AT SANTOSH OFFER
